Itinerary

[\(Click here for Route Map\)](#)

Departing from Quorn at 8.00am we travel through the breath taking Warren Gorge in search of the yellow footed rock wallabies and then continue on through some sheep stations on the dirt back roads stopping at an evocative and picturesque ruin of a stone farm house for morning tea.

Next we visit the outback town of Hawker and check the seismograph for any earth tremors. Continuing on to Wilpena Pound and the Ikara-Flinders Ranges National Park.

Travel 3/4 of the way into the crater like landscape of Wilpena Pound leaving the 800 metres to walk and see the Hills residence and view the inspiring inside of the Pound from the lookouts followed by a healthy picnic lunch.

For the remainder of the afternoon we 4wd through the stunning landscapes of the Bunyeroo and Brachina Gorges and marvel at the amazing ancient geological rock formations including a viewing of the Archeocyatha Fossil (530 million years old!) and ripple rocks from the ancient sea beds as well as the magnificent views.

The day is filled with spotting Australian birds and wildlife in their natural surrounds and being with a local tour guide who will offer a lot of information throughout the day. Returning to Quorn at approx 4.30 - 5.00pm
